SITUATION SUMMARY

Northern California Weather of Concern

A low pressure system in the eastern Pacific will bring cooler, wet weather to Interior Northern California beyond midweek. Ahead of the storm, breezy conditions and low humidity Tuesday afternoon into Wednesday evening will increase the potential for fires to develop and spread rapidly. Precipitation potential for Interior Northern California increases in the Coastal mountains Wednesday, spreading over much of the forecast area into Thursday. Scattered showers and mountain thunderstorms are possible Friday.

Potential Impacts

- Fire weather concerns Tuesday and Wednesday ahead of storm.
 - Potential aggressive wildfire growth in the mountains.
 - A Red Flag Warning is in effect for the West Slope Sierra Nevada from 1400 Tuesday to 2000 hours Wednesday for wind and low relative humidity. This Warning extends from the Burney Basin to north of Yosemite for elevations above 3000 ft. Humidity 15-25 percent and southwest winds 15 to 25 mph with gusts 35 to 45 MPH. These conditions have potential to cause rapid fire growth over existing fires, especially the King Fire.
 - A Red Flag Warning is in effect from 1100 hours to 2300 hours on Tuesday for portions of Siskiyou County.
 - A Red Flag Warning is in effect from 1000 hours on Tuesday to 2300 hours on Wednesday for portions of Modoc County.
- Moderate to strong winds
 - Moderate to strong winds will provide an environment for rapid fire spread ahead of the rainfall on Tuesday and Wednesday.
- Heavy precipitation
 - A prolonged period of moderate to heavy rain could result in rock slides, mudslides and flooding on burn scars from wildfires this summer and last summer.
 - The issuance of Flash Flood Watches is anticipated for burn scar areas in western Siskiyou County. Since the Boles Fire in Weed was on fairly level, urban terrain, impacts from the approaching storm are not a major concern there.
 - There is concern for Mud Creek on Mt. Shasta where a debris flow occurred on Saturday, 09/20/14. The rain may cause additional flows due to the destabilized canyon walls. Two staff from the NWS Medford Weather Forecast Office surveyed the area; the only expected significant impacts there will be to the two (Forest Service) roads impacted over the weekend. No adverse impacts are expected for CA Highway 89.
 - Moderate rainfall will help suppress wildfire activity, beginning Wednesday afternoon
- Colder temperatures
 - Night time temperatures will be cool some frosts are possible at higher elevations; a widespread freeze is not expected at this time.
 - Snow levels are likely to remain high; 8,500-10,000 feet.

WEATHER

WEATHER SYNOPSIS BY REGION:

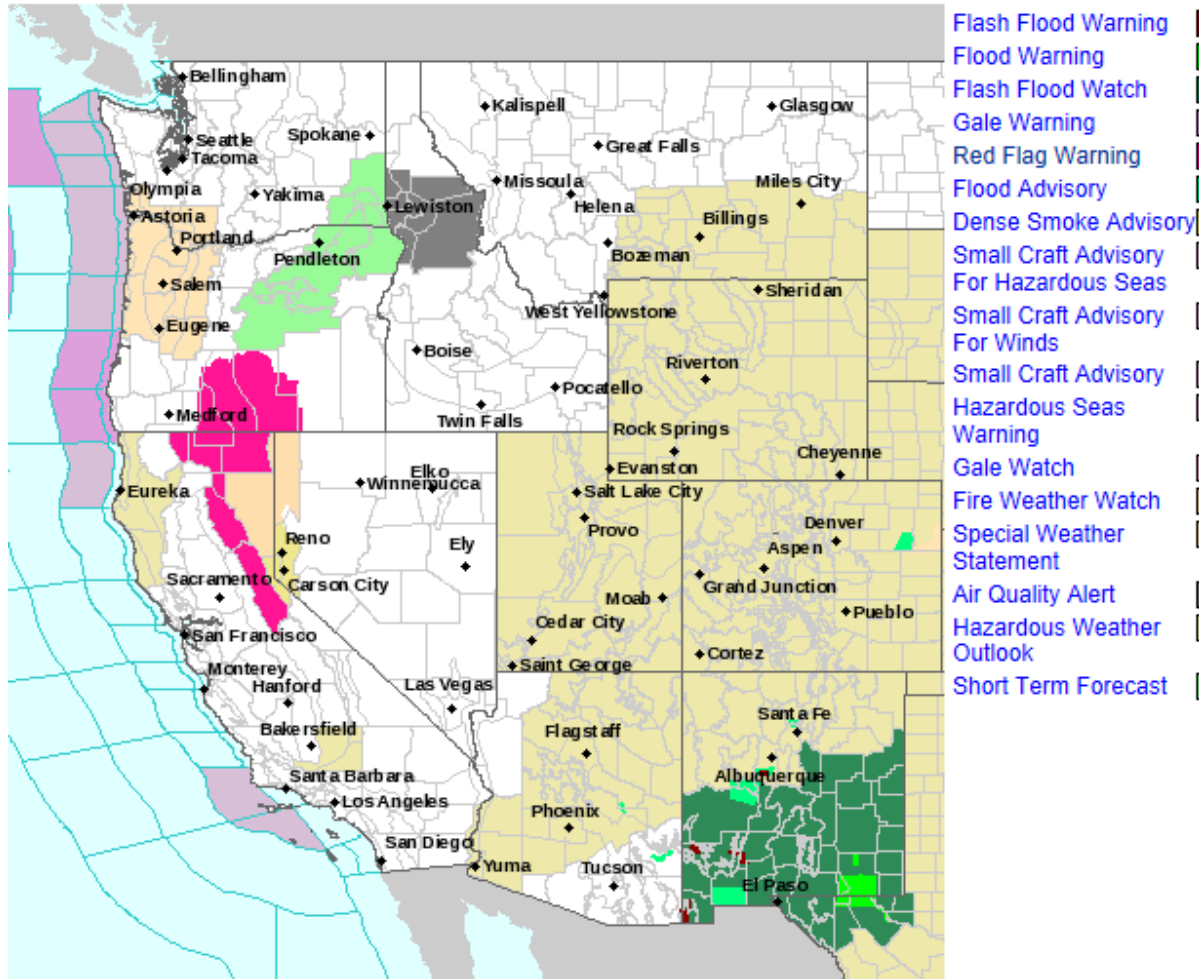

NORTHERN CALIFORNIA

Today, northern California is in between weather systems as a couple of off shore low pressure troughs take shape and begin moving east. Increasing southwest winds will develop over the region during the next few days as these systems approach. The first system will weaken considerably as it moves east but may still bring some light rain to the northwest coast areas Tuesday. The second system will arrive off shore later Tuesday and slowly move ashore Wednesday with rain. Much of the western half of the Geographic Area should have some rain by late Wednesday night. Eastern areas will see precipitation develop as the low continues moving slowly eastward Thursday. The trough will linger Friday and quite possibly into Saturday, and showers are expected to continue over the northern areas in particular. Early next week, a high pressure ridge will move in from the west, and conditions are likely to dry and warm considerably. Wind speeds will generally be 8-20 mph Tuesday and Wednesday with gusts mostly 30-40 mph, although some gusts to around 50 mph may be possible over the highest ridges in the northwest mountains and over the Sierra. Temperatures will be on a cooling trend for the next few days, but Thursday and Friday will likely be the coolest days of the week with warmest inland valley afternoon highs in the upper 70s and on the order of 10 degrees below seasonal normal.

SOUTHERN CALIFORNIA

A ridge of high pressure centered over Southern California will bring a warming trend and low relative humidity away from the coast through Wednesday. Maximum temperatures will be near normal today, with 70s to low 80s in the mountains and mid 80s to mid 90s in the valleys. Minimum relative humidity will be between 12% and 25% away from the coast through Wednesday. Winds will mostly be variable, less than 10 mph through Wednesday. A Pacific trough will move into the West Coast bringing a cooling trend to the region Thursday through Saturday. Temperatures will become well below normal Friday and Saturday. This trough will also bring scattered showers and isolated thunderstorms from a Monterey/Fresno County line northward Thursday afternoon through Saturday evening. Rainfall totals look to be mainly under a quarter inch, but up to a half inch may fall over the Sierra. Southwest to west winds of 20 to 30 mph with gusts to 50 mph will surface across the mountain ridges and desert passes Thursday afternoon through Friday evening. The marine layer will become deep over Southern California by Friday morning, with low clouds and fog making it over the lower coastal mountain slopes. The trough will move to the east of the region bringing some warming and drying Sunday.

- Cal OES SOC is activated to Level 2 and staffed with the White IST at 0700 hours.

Shelter Operations

- American Red Cross Shelter - Mount Shasta Armory, 618 Everitt Memorial Hwy, Mount Shasta. Current population – 7.

Fire Suppression Water Issue

- The City of Weed lost one of their drinking water storage tanks and is drawing water from a second tank. Cal OES is working with the Drinking Water Program to assist with finding a solution to this issue. The State Water Quality Control Board, Drinking Water Program (DWP) has reached out to the city. Per DWP, the City of Weed water system has six reservoirs (storage tanks). The one that was damaged by the fire was one of their smallest reservoirs. There are no issues with the drinking water supply. They lifted their self-imposed boil water order in the downtown area. City is concerned with water supply to fight fires in the future. As an interim solution, water tenders are in place throughout the city to provide water for fire suppression.

Schools

- Weed High School and Weed Elementary School will be open for normal operations on Tuesday, September 23, 2014.
- The elementary school was partially damaged but staff will transfer classes to other parts of school.
- Students will be bussed through the fire zones.

CAL OES MISSIONS

New Cal OES Missions:

- None

Mission:

We protect lives and property, build capabilities, and support our communities for a resilient California.

We achieve our mission by serving the public through effective collaboration in preparing for, protecting against, responding to, recovering from, and mitigating the impacts of all hazards and threats.
